Permit No. 21476, issued on August 27, 2019 (84 FR 48600; September 16, 2019), authorizes the permit holder to conduct research on 32 species of marine mammals including the following ESA-listed species: blue (*Balaenoptera musculus*), bowhead (*Balaena mysticetus*), fin (*B. physalus*), Hawaiian insular false killer (*Pseudorca crassidens*), humpback (*Megaptera novaeangliae*), sei (*B. borealis*), sperm (*Physeter macrocephalus*), and Western North Pacific gray (*Eschrichtius robustus*) whales. Authorized research activities include unmanned aerial surveys and vessel surveys in U.S. and international waters of the Pacific Ocean near Hawaii, Alaska, and U.S. territories. Permitted research activities include photography and video recording (above water and underwater), photogrammetry, counts, passive acoustic recording, biological sampling (skin and blubber biopsy, sloughed skin, exhaled air, and feces), and suction-cup tagging.

The permit holder is requesting the permit be amended to: (1) increase the permitted takes from 2,000 to 4,000 annually for Level B harassment activities for spinner dolphins (*Stenella longirostris*) in Hawaii; and (2) increase the number of suction-cup tagging takes from 10 to 20 annually for humpback whale calves in Hawaii from the non-ESA-listed Hawaii distinct population segment. No changes to the permitted objectives, methods, or locations are proposed. The permit expires on August 31, 2024.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.
